Education

University of Applied Sciences SRH Heidelberg — Heidelberg, Germany
Msc Applied Data Science and AI — October 2025 - Present

Sikkim Manipal Institute of Technology — Sikkim, India
BTech Computer Science (Academic Scholarship Holder) — October 2020 - October 2024

Experience

Deutsche Bank — April 2026 - Present
AI/ML Engineer (Project Partner) — *Remote, Germany*

- Benchmarking agentic AI and LLM-based NLP workflows using Knowledge Graphs to measure reliability and non-deterministic behaviour across production-grade pipelines.
- Building end-to-end RAG pipelines and LLM orchestration systems using LangChain and LangGraph conducting rapid prototyping in an Agile/Scrum environment with iterative sprint cycles.
- Comparing RAG and GraphRAG to check token usage and hallucination rates for non-deterministic LLM outputs in financial NLP workflows.

Open Source Contributor (AI Tooling & GenAI Development) — August 2024 - August 2025
Community Contributor & Hackathon Participant — *Remote*

- Identified and reported a critical tool-calling bug in LangChain's GROQ Models integration, improving reliability for thousands of downstream users building LLM agent workflows.
- Built End-to-End N8N automation agents for offline lead intelligence gathering and sales prospect enrichment.
- Built **MindWell** at the Google DeepMind Hackathon a fully offline AI therapy desktop app using Electron, FastAPI, LangChain, and Gemma3n via Ollama, featuring mood tracking, journaling, and multilingual summarization bundled with a custom NSIS installer.

Keysight Technologies — February 2024 - July 2024
DevOps Engineer Intern — *Delhi, India*

- Architected and deployed 2 Jenkins CI/CD pipelines on AWS infrastructure provisioned via Infrastructure-as-Code, delivering 5 production enhancements including automated failure categorisation that significantly reduced debugging time.
- Containerised build environments with Docker and reduced manual operational overhead by 50% through automation scripts integrating Bitbucket, Eggplant, and JFrog Artifactory across teams in the US and Penang.
- Collaborated in a cross-functional, internationally distributed team, gaining hands-on experience with enterprise DevOps toolchains and IaC-driven deployment workflows.

ResoluteAI.in — February 2023 - May 2023
Deep Learning Engineer Intern — *Remote, India*

- Built YOLOv6-based Computer Vision proof-of-concepts for real-time detection of humans, vehicles, and traffic signals trained on custom-annotated datasets, achieving high inference accuracy under live conditions.
- Managed the full ML lifecycle including data collection, annotation, model training, evaluation, and deployment optimisation for edge-case robustness.

Projects

AgentFolio — January - March 2026

- Built a fully agentic AI portfolio platform featuring a tool-calling pipeline that fetches live GitHub activity via real-time token streaming, giving visitors an always up-to-date view of ongoing work.
- Engineered a custom LLM response parser that dynamically injects GSAP animations into generated UI components, producing a uniquely interactive and visually responsive user experience.
- Implemented Groq API response caching that eliminated redundant external API calls across 75% of visits, significantly improving load times and reducing costs.

TenderFlow — April 2026

- Built an AI-powered tender response agent using a LangGraph StateGraph with human-in-the-loop review, reducing RFP drafting time from days to hours by auto-assembling responses from a pgvector-indexed knowledge base.
- Designed a KB ingestion pipeline with model-routed Claude calls and Pydantic-validated schemas.
- Implemented FastAPI endpoints for HITL interrupt/resume cycles with Supabase PostgreSQL checkpointing, enabling reviewers to edit, score, and iterate on drafted sections across up to 3 revision rounds.

Skills

Programming:	Python (OOP), SQL, TypeScript
Frameworks & APIs:	FastAPI, Pydantic, React, REST APIs, LangChain, LangGraph, Ollama
Cloud & DevOps:	AWS (Lambda, EC2), Docker, Jenkins, GitHub Actions, CI/CD, Kubernetes
Data & AI:	LLM Architectures, Agentic AI, RAG, MCP, A2A, Prompt Engineering, Knowledge Graphs, N8N, Claude, Co-Pilot
Tools:	Git, Bitbucket, Jira, VS Code, JFrog Artifactory, Eggplant
Soft Skills:	Cross-functional Collaboration, Agile/Scrum, Technical Communication
